

# PABLO DE CECCO

Developer

## ABOUT ME

I'm a versatile and experienced web developer with a comprehensive background in both backend and frontend development. My journey has given me a well-rounded skill set, enabling me to adapt to a wide range of technical challenges and environments. With experience in various industries and projects, I've built the resilience and problem-solving skills necessary to tackle complex tasks and deliver results, no matter the project demands. Confident in my adaptability, I'm prepared to handle any development role and contribute effectively from day one. My goal is to leverage my technical skills and adaptability in challenging roles, driving impactful solutions and continuous growth within a collaborative team.

## EXPERTISE

■ PROBLEM-SOLVING	90%
■ LEADERSHIP	80%
■ ADAPTABILITY	85%
■ TIME MANAGEMENT	90%
■ COMMUNICATION	80%
■ ANALYTICAL THINKING	85%

## EDUCATION

### Technician Programmer

2013 - 2018

#### Universidad Tecnológica Nacional

I completed a **Technician Programmer** program at UTN in Buenos Aires, building foundational skills in programming, databases, and software development, which prepared me for versatile roles in tech

### SQL Server and Data Science

2012 - 2015

#### Educacion IT

2024 - Now

Learned database design, querying, and optimization for efficient data management.

Currently studying Python, AI, and data analysis to gain insights from large datasets.

## WORK EXPERIENCE

### Tata Consulting Services

2019 - Now

#### Full stack Developer

I specialized in the **MEAN stack (MongoDB, Express, Angular, Node.js)** to build a high-performance internal application. Developing secure APIs, managing complex data workflows with MongoDB, and designing responsive, user-focused interfaces with Angular. I implemented **automation processes**, including multi-stage document reviews and email notifications, to streamline the auditing pipeline. Working in an agile team, I ensured efficient collaboration and maintained high code quality with Git, contributing to a scalable and robust application tailored for auditing needs.

### Union Ferroviaria

2019 - 2019

#### Mobile Application Developer

I developed a mobile application to provide essential information to union employees, using **ionic and Firebase** as the main technologies. The app, available on both Android and iOS, was designed to be user-friendly and accessible, supporting internal communication within the union. In this role, I honed my skills in **cross-platform development** and **real-time data management** with Firebase, allowing for efficient and fast updates. This project showcases my ability to independently create practical, functional solutions with a strong focus on usability and connectivity for a targeted audience.

### Overactive

2019 - 2019

#### Front-End Developer

I worked on a project utilizing **Angular** and **TypeScript** with **Material Design** to build a dynamic, user-centered application. Creating clean, responsive interfaces and implementing **unit testing** with **Jasmine and Karma** to ensure high code quality. I also gained experience with **Jira** for task tracking and **Git** for version control, supporting efficient team collaboration and agile development. This position allowed me to sharpen my skills in **front-end development**, testing, and project management, with a focus on delivering a polished, scalable product.

# SKILLS

## ■ Frontend

HTML5, CSS3, JavaScript, Angular, Sass, Material Design, Bootstrap, TypeScript **(Advanced)**.

## ■ Backend

Node.js, **(Advanced)**.  
Go, PHP, ASP, ASP.NET **(Intermediate)**.

## ■ Databases

SQL Server, MySQL, PostgreSQL, Mongo, **(Advanced)**.  
Firebase **(Intermediate)**.

## ■ Devs Tools and Testing

Git, Jira, **(Advanced)**.  
Karma & Jasmine, RabbitMQ **(Intermediate)**.

## ■ Cloud Computing

Microsoft Azure, **(Advanced)**.  
AWS, GCP **(Intermediate)**.

## ■ Others

Python **(Intermediate)**.  
C++, Java **(Basic)**.

# Achievements

## ■ Tata Consulting Service

Enhanced workflow efficiency in an auditing app with automated document reviews and notifications.

## ■ Accenture

Lead an eight-person team software and served as technical lead on a U.S. client's web app, prioritizing UI and UX.

## ■ Union Ferroviaria

Built a cross-platform app for union employees, using Ionic and Firebase for real-time updates.

# Languages

# WORK EXPERIENCE (Continued)

## Accenture

2018 - 2019

### Technical Lead and Full Stack Developer

Initially working on integrating Oracle Service Cloud with external APIs. I led a team of eight developers in building software for a company in telemarketing operations, overseeing both backend integration and front-end design for efficiency and usability. Later, I transitioned to work with **ionic and Node.js** on mobile projects and eventually became the frontend lead for a U.S.-based client, where I developed a responsive web application for a funeral services company. This role honed my skills in **team leadership, API integration, and front-end architecture** in an agile, client-facing environment.

## Universidad de Belgrano

2016 - 2017

### Full Stack Developer and System Analyst

I focused on enhancing the university's administrative system. Gathering requirements, analyzing and developing solutions, and implementing features using **AngularJS, PHP, PostgreSQL, Bootstrap, and jQuery**. I contributed to a significant migration project, moving from AngularJS to Angular 2, improving system performance and scalability. This position allowed me to deepen my skills in **system analysis, front-end development, and database management**, working closely with team members to optimize the university's administrative processes.

## Aw Software

2016 - 2016

### Software Developer

I worked on a project outsourced for a Bank, focusing on developing online banking systems for both personal and business clients. While the role involved limited hands-on programming, I gained valuable experience with **agile methodologies** and worked extensively with **Jira** to manage tasks across a large team, including collaboration with around 20 testers and 30 developers. I also contributed to the mobile banking project, where I developed skills in **team coordination** and **project organization** within a structured, fast-paced environment.

## Cor Consulting

2015 - 2016

### Full Stack Developer

I contributed to a documentation management system tailored for banks. I developed and maintained features using **jQuery, ASP, HTML, CSS, and SQL Server** to ensure smooth functionality and data handling. This role enhanced my skills in **legacy system maintenance, front-end scripting, and database management** in a fast-paced, small-team environment, providing personalized support and solutions for financial clients.

## Grupo Palmero

2010 - 2015

### Systems Administrator and Web Developer

I worked as a **Systems Administrator and Web Developer**, managing the company's ERP system, InfoBroker, across modules like sales, treasury, accounting, and inventory. I developed reports in **Pentaho** and handled database management with **SQL Server**, ensuring efficient data flow across departments. Additionally, I implemented and maintained the company's websites, initially using **PHP, CSS, and JavaScript**, later migrating everything to **WordPress** and optimizing for **SEO**. I also managed domain administration and designed custom sites for clients, including a vineyard in Mendoza and a cemetery in Spain
